Package Management

Add/Edit/Delete Packages (Upload images, set itinerary).

Booking Management

View Bookings, Update Status (Confirmed, Cancelled).

Inquiry Management

Handle user queries.

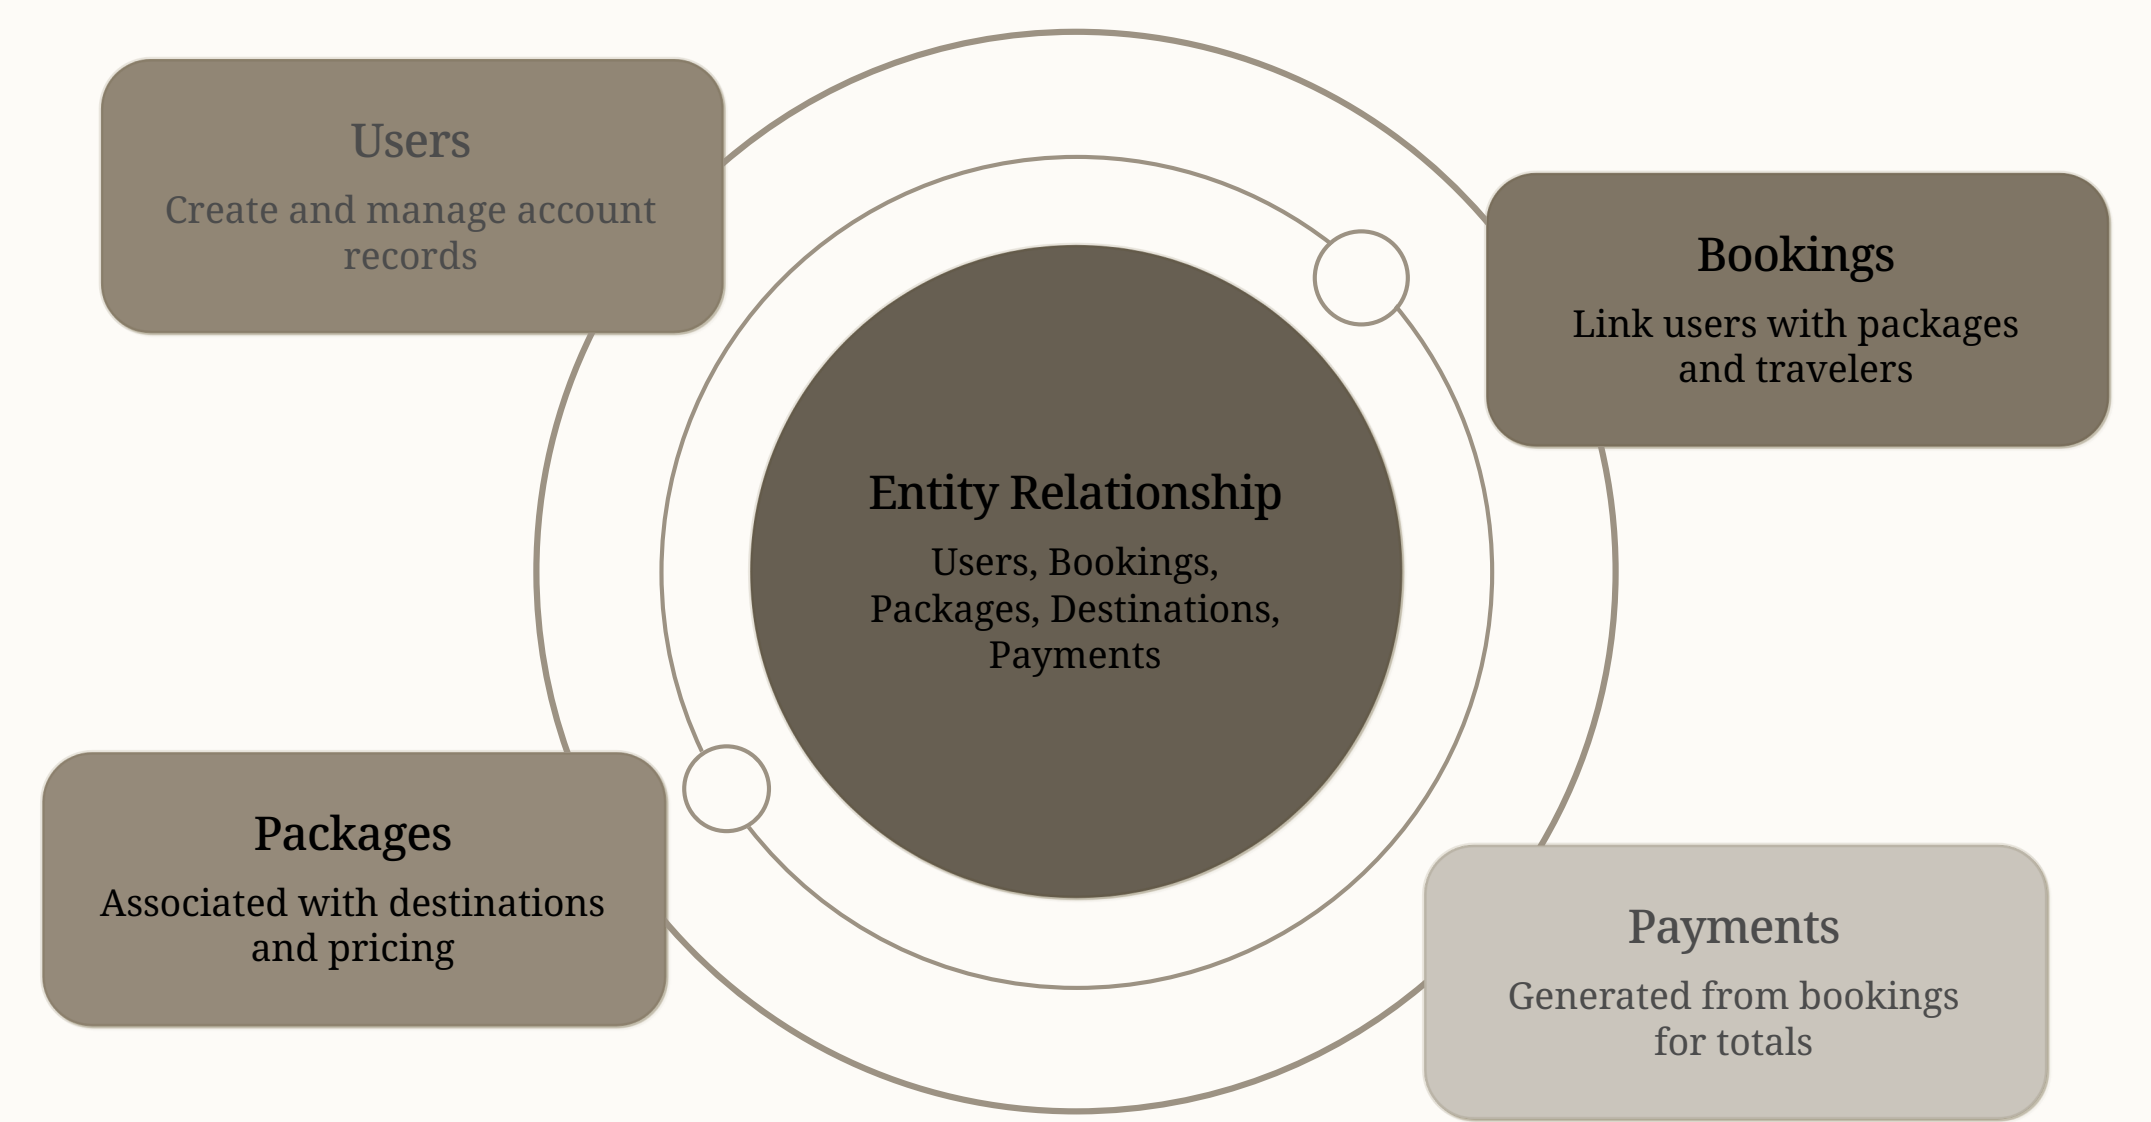

Banner Management

Change homepage banners.

Database Schema (Tables)

Users Table	ID, Name, Email, Phone, Password
Destinations Table	ID, Name, Image
Packages Table	ID, Destination_ID, Title, Price, Duration, Itinerary, Images
Bookings Table	ID, User_ID, Package_ID, Travel_Date, Total_Amount, Status
Travelers Table	ID, Booking_ID, Name, Age, Gender
Payments Table	ID, Booking_ID, Transaction_ID, Status

The schema establishes clear relationships between users, their bookings, travel packages, individual traveler records, and payment transactions — forming the backbone of the TravelVibe platform.
